k|stone® is a high composite 'solid surface' material developed by knief & co., the leading german bathroom equipment manufacturer. by its chemical composition k|stone® is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. the addition of different natural pigments allows this material to be available in numerous colors and effects. resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make k|stone® the first choice for interiors when hygiene and neat design matter the most. the material has many advantages:

- waterproof: corrosion or swelling due to steam or moisture is not possible. the surface cannot be damaged by moisture, rot or mildew and liquids cannot penetrate it.
- 100% durable due to impact and shock resistance
- 100% hygienic, dirt repellent and stain resistant due to non-porous surface
- chemical resistant
- completely homogenous
- thermoformable
- pleasant to the touch
- easy to repair and care
- flame and heat resistant (for a short time over 200 °c)
- environmental friendly, 100% recyclable

by using different grinding media with different grain size the gloss level of the surfaces can be adapted to your desired degree. despite its resistance k|stone® is easy to mill, cut, drill, or grind. like this, individual lettering or logos can be milled into the material. besides acrylic, k|stone® is perfect for combination with other materials. whether it is glass, wood, plexiglass or non-ferrous metals the diversity is huge.

k|stone® is not only applicable in the sanitary sector. also kitchens, laboratories, shops or other design projects provide a perfect space for application. there are numerous possibilities, let your imagination run wild. k|stone® is pure quality, 100% made in europe.
